CAREER OBJECTIVE

Motivated B.E. Computer Science graduate seeking an entry-level software development opportunity to apply my skills in Python , Django, SQL, HTML, CSS, and JavaScript while contributing to organizational growth.

EDUCATION

Bachelor of Engineering in Computer Science **2022–2026**
Jain College of Engineering, Belagavi

Pre-University Course (PUC) **2020–2022**
KLE Independent PU College, Chikodi

INTERNSHIP

AIML Intern **Aug 2025 – Dec 2025**
JCE Innovation and Entrepreneurship Foundation (JIEF), Belagavi, Karnataka

TECHNICAL SKILLS

Web Technology

HTML & CSS

- Strong understanding of HTML5 structure, semantic elements, forms, tables and lists.
- Hands-on experience with HTML attributes, links, images and multimedia elements.
- Knowledge of CSS selectors, combinators, pseudo-classes and pseudo-elements.
- Responsive layouts using box model, positioning, display properties, Flexbox and Grid.
- Static webpages: Knight Bite, redBus, Amazon, Blink It and other practice sites.

JavaScript

- Good understanding of JavaScript fundamentals, including variables, data types, operators, control statements, and functions
- Familiar with arrays, objects, ES6 features, string methods, and array methods.

LANGUAGE – Core Python

- Good understanding of Python fundamentals, including variables, data types, operators, conditional statements, loops, functions, strings, lists, tuples, sets, dictionaries, File Handling , Exception Handling and Object-Oriented Programming (OOP) concepts

DATABASE – Oracle SQL

- Good understanding of Oracle SQL, including SQL commands, clauses, operators, joins, subqueries, and data retrieval and manipulation using Basic SQL queries.

BACKEND FRAMEWORK – DJANGO

- Good understanding of Django framework, MVT , MVC architecture, URL routing, views, templates , Models and CRUD operations
- Developed Django-based E-commerce Website and Article website with dynamic rendering and database integration.

PROJECTS

Smart Fertilizer Dosage Recommender Using Live Weather | Python, Flask, Streamlit, Pandas, Weather API, CSV

- Developed a rule-based fertilizer recommendation system to calculate crop-specific NPK (Nitrogen, Phosphorus, Potassium) requirements using soil nutrient data.
- Integrated Weather API to fetch real-time temperature and humidity and adjust fertilizer dosage based on weather conditions.
- Built a Flask backend and an interactive Streamlit interface to display fertilizer recommendations and crop-specific guidance.

Amazon Web Page Clone | HTML , CSS

- Developed a responsive Amazon-inspired e-commerce webpage using HTML and CSS.
- Designed a navigation bar with a search bar, product categories, shopping cart, and product display sections.
- Implemented CSS Flexbox, layouts, and styling to create a user-friendly interface resembling an e-commerce platform.

To-Do List Web Application | Python, Django, HTML, CSS, SQLite

- Developed a task management web application using Django's Model-View-Template (MVT) architecture.
- Implemented CRUD operations to add, view, update, and delete tasks, along with task completion and trash management.
- Integrated SQLite database for persistent task storage and used Django URL routing and views to handle application functionality.
